KANOSH BAND OF PAIUTES GEOTHERMAL INTERNSHIPS

Drone magnetometry is used to reveal boundaries of different rock types that provide clues to where geothermal fluid pathways are located.

Paid Internships for Tribal Students in Spring of 2025

Ormat Technologies, an international energy development company, will be conducting geothermal energy exploration activities on Kanosh Band lands in Millard County in the spring of 2025. Funding for the research, which comes from a Bureau of Indian Affairs Energy and Mineral Development Program Grant, provides for college or high school-aged Tribal interns to assist with geothermal exploration efforts.

- Perfect for students interested in energy exploration, the physical sciences, or conservation.
- Where possible, internship activities will be conducted around school schedules.
- Interns will earn $20 an hour.
- Interns will gain valuable, resume-building experience.
- Interns will be selected by the Kanosh Band Council from the pool of qualified applicants.

Submit a personal statement that includes proof of Tribal affiliation, student status, and describes your interest in energy exploration, the physical sciences, or conservation. Also reflect on what you hope to gain from the internship experience.
